

Website Architecture & Page Blueprint: VRS Tangent

Page 1: Home Page

- **Hero Section:**
 - **Headline:** Building Adaptive Resilience Across Cyber, AI, and Regulatory Frontiers.
 - **Sub-headline:** Strategic advisory, ISO compliance, and enterprise training designed to insulate organizations against digital and algorithmic vulnerabilities.
 - **Call-to-Action (CTA):** "Schedule an Executive Consultation" | "Explore Services"
- **Core Value Pillars:**
 - *Cybersecurity & SOC Advisory:* Resilience strategies built for evolving threat landscapes.
 - *AI Governance & ISO 42001:* Safe deployment, algorithmic transparency, and risk controls.
 - *Information Security & ISO 27001:* Standards-led frameworks ensuring operational continuity and data privacy.
- **Executive Spotlight Teaser:** Brief feature introducing Dr. Farhat Jummani's academic leadership and domain expertise in technology risk governance.
- **Trust Indicators:** ISO Standards badges (ISO 27001, ISO 42001), ISACA affiliation highlights, and key focus domains.

Page 2: About Us

- **Company Overview:** Highlighting the philosophy behind "Vulnerability Resilience Strategy" (VRS)—transforming reactive threat management into proactive governance.
- **Our Mission:** Empowering enterprise leadership, Chief Risk Officers (CROs), and CISOs to innovate confidently with structured compliance and risk controls.
- **Why VRS Tangent:**
 - Dual focus on classical cybersecurity and emerging AI risk.
 - Academic research integrated with practical enterprise execution.
 - End-to-end support spanning advisory, training, and certification readiness.

Page 3: Core Services

- **Advisory & Strategic Consulting:**
 - Security Operations Center (SOC) optimization, threat architecture, and incident response planning.
 - Data privacy governance, regulatory risk management, and compliance structuring.
- **ISO & Compliance Readiness:**

- *ISO 27001 Support:* Information Security Management System (ISMS) implementation, gap analysis, internal auditing, and certification prep.
- *ISO 42001 Support:* Artificial Intelligence Management System (AIMS) framework design, ethical AI risk mapping, and policy establishment.
- **Enterprise Training & Certifications:**
 - Custom executive workshops on AI risk and corporate governance.
 - Specialized training modules for security teams, data protection officers, and compliance leads.

Page 4: Leadership Profile — Dr. Farhat Jummani

Header & Bio

- **Title:** Promoter & Lead Consultant, VRS Tangent
- **Summary:** A distinguished academician, researcher, and risk strategist specializing in cybersecurity, machine learning applications, AI governance, and compliance standards. Dr. Jummani bridges complex technical research with enterprise resilience strategies.

Academic & Institutional Credentials

- **Doctoral Credentials:** Advanced research contributions in technology risk, cybersecurity, and intelligent threat detection systems.
- **Professional Leadership:** Active institutional leadership, including executive roles such as Secretary for the ISACA Mumbai Chapter.
- **Editorial & Scholarly Contributions:** Chief/Associate Editor and contributor to published academic research on AI-driven curriculum transformations, cybersecurity threat analysis, and digital governance.

Specialized Domain Expertise

- *Artificial Intelligence & Governance:* Algorithmic risk management, ISO 42001 framework implementation, and Explainable AI (XAI) security research.
- *Cybersecurity & Threat Detection:* Specialized focus on anti-phishing mechanisms, machine learning classifiers for threat detection, and data privacy governance.
- *Executive Training:* Curating high-impact educational curricula for organizations navigating complex digital risk landscapes.

Page 5: Insights & Research

- **Featured Articles:** White papers and posts on ISO 42001 adoption, Explainable AI in security, and SOC optimization.
- **Research & Publications:** Summaries of scholarly contributions by Dr. Jummani and the VRS Tangent advisory panel.
